Sir:

In response to the Office Action (Paper No. 12) dated August 25, 1999, please amend the

above-identified application as follows:

IN THE CLAIMS:

1. (Twice Amended) An image sensor device which optically reads out a document comprising:  
an image sensor portion having a plurality of light receiving elements facing a document to be read out; and  
a thin film light source arranged on the document side of said image sensor portion, said thin film light source emitting light to said document,
